Notes:

This report includes summer flounder landings from the week ending January 1, 2000, therefore, some landings may be from the 1999 Quota Period. These landings will be separated into their respective quota periods at a later date, at which time the landings data for each quota period will be adjusted accordingly.

**Quotas used on this report are proposed 2000 Federal quotas.**

If negative late entries are present on this report, they are the result of corrections made to the database.

For the week ending **29-JAN-00**, 236 dealers held a federal summer flounder permit. Of those 236 dealers, 169 (72%) have submitted a weekly quota report for the current reporting week. Because Massachusetts dealers submit weekly quota reports directly to the state, they were not included in these calculations.

These data are the best available to NMFS when this report was compiled. Data are supplied to NMFS by dealers and/or state agencies and may be preliminary. Data supplied by the State of Massachusetts are as of the week ending January 29, 2000.

The following summary is updated as information is received, and may not reflect recent state actions. Readers are urged to contact the appropriate state agency for further information.
